NOVALLA

BUILDING, INNOVATING AND PERFECTING YOUR PROJECTS

NOW WE'RE BUILDING !

The Novalla Group is expanding its range of services with the creation of Novalla Construction SA. This new entity is positioned as a partner of choice for the implementation of construction, conversion and structural work projects. Drawing on our historic expertise in concrete cosmetics and the protection of mineral surfaces, Novalla Construction SA is able to offer technical and aesthetic solutions, while guaranteeing the robustness and durability of each project. Our team combines innovation, precision and an unwavering commitment to quality standards to successfully complete ambitious projects that meet our customers' highest expectations.

OUR NEW SECTOR WILL FOCUS ON THREE MAIN AREAS:

REINFORCED CONCRETE | MASONRY

TRANSFORMATION | RENOVATION

SAWING | DRILLING | DEMOLITION

To head up this sector, we are pleased to introduce Mr Helder De Oliveira as Head of Structural Works. With his solid experience in the field, Mr De Oliveira brings practical expertise and a strategic vision that will enable us to meet the most demanding challenges. His leadership, combined with our expertise in concrete processing, will enable us to offer our customers projects that combine technical performance with aesthetic quality.

«For me, being there every step of the way is essential. At Novalla Construction SA, we are committed to being responsive and to meeting our customers' needs spontaneously and efficiently. Our priority is to build with rigour while remaining available and attentive to every detail.»

Helder De Oliveira - Head of structural works

REINFORCED CONCRETE | MASONRY

«Respecting deadlines, budget and quality.»

We apply our expertise in reinforced concrete and masonry to demanding, innovative projects. Whether building new structures or carrying out large-scale masonry work, we are committed to meeting the highest technical standards and delivering high-quality, sustainable solutions.

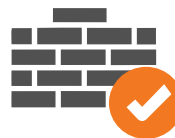

An integrated approach to concrete

By combining this new area of construction with our expertise in the treatment of concrete, we are creating a unique approach. We will now be able to offer a complete range of services, from the realisation of ambitious architectural projects to high-precision visual finishes. This synergy will enable our customers to benefit from a global approach, guaranteeing high-performance results both technically and aesthetically.

Respecting deadlines and budgets

Rigorous project management, to ensure that every project is delivered on time and on budget.

Ensuring the quality of materials and techniques

We work with top-quality materials and use modern techniques to guarantee the durability and safety of the work we carry out.

Proposing sustainable solutions

Because we care about the environment, we incorporate ecological standards into our construction projects to improve energy efficiency and reduce our carbon footprint.

REINFORCED CONCRETE

This department plays a key role in the construction of foundations, piers, slabs and load-bearing walls requiring increased strength. Using advanced casting, formwork and reinforced concrete processing techniques, we ensure durable, safe structures that meet modern construction standards.

MASONRY

Our masonry department combines traditional craftsmanship with cutting-edge techniques to create robust, precise structures that meet today's requirements. Thanks to this approach, we are able to offer creations that combine authenticity and performance, in perfect harmony with the specifics of the site.

TRANSFORMATION | RENOVATION

«A world in perpetual change.»

At Novalla Construction SA, we offer specialist services in the field of heavy and light conversion, a crucial sector for renovating, adapting and modernising existing structures. Whether it's the complete renovation of buildings, structural modifications or the extension of existing structures, our expertise in masonry enables us to meet the most diverse needs of our customers.

OUR AREAS OF EXPERTISE

Transformation : We work with you on your transformation projects to breathe new life into existing spaces and adapt them to today's needs. Whether it's a question of structural changes or optimising volumes, our team uses precision and expertise to carry out work that combines functionality and aesthetics, while respecting the specific features of each building.

Renovation : Our renovation service meets the requirements of modernisation, safety and sustainability of existing buildings. From refurbishment to complete renovation, we use appropriate techniques to extend the life of buildings while respecting their original character, to deliver results that are both effective and harmonious.

WHY CHOOSE NOVALLA FOR YOUR TRANSFORMATION PROJECTS ?

Thanks to its recognised expertise, Novalla has been a key player in concrete cosmetics and protection for several years. Combining modern and traditional masonry techniques, we offer customised solutions for residential, commercial and industrial projects.

OUR SKILLS

- TRANSFORMATION
- RENOVATION
- FACADE RESTORATION
- EXTENSIONS
- SEISMIC REINFORCEMENT AND SAFETY
- CRACK SEALING
- STRENGTHENING STRUCTURES
- CONCRETE SANITATION
- UNDERWORK

SAWING | DRILLING | DEMOLITION

«Controlled demolition for minimal impact.»

Novalla Construction SA offers controlled demolition services, as well as precision sawing and drilling.

These techniques make it possible to dismantle or adjust existing structures with great meticulousness, while complying with safety standards.

We work on structures of all sizes, guaranteeing fast, clean results tailored to your specific needs.

Precision : Precise demolition and cutting techniques for optimum control.

Security : Strict compliance safety standards to protect staff and the environment.

Recycling : Commitment to recycling materials to reduce our environmental footprint.

PREPARE AND ADAPT YOUR SPACES WITH PRECISION

Our sawing, drilling and demolition services meet the needs of conversion and renovation projects. Sawing allows the creation of openings (windows, doors), drilling facilitates the passage of cables and pipes, while partial demolition prepares spaces for new installations. Thanks to our expertise, we can guarantee precise and safe operations, perfectly adapted to the constraints of each project.

OUR SKILLS

Sawing : Precise cutting of concrete to create openings and expansion joints, without excessive vibration.

Drilling : Creating passages in the ground or concrete for installing conduits and infrastructure anchors.

Demolition : Controlled demolition of major structural elements such as load-bearing walls and concrete slabs.

We specialise in a wide range of building services.

Choosing Novalla means opting for a partner you can trust, whose expertise and made-to-measure solutions will ensure you have quality structures that stand the test of time.

Our staff will be happy to advise you on site or by telephone to meet your expectations. We can also arrange for you to visit our offices.
